Cable Ties from L.H. Dottie – the Perfect Way to Bundle, Secure and Identify

- Consistent quality from statistically controlled molding processes
- Industries highest tensile strength with the lowest insertion force
- Made in U.S.A. 
- 100% product guarantee
- UL recognized for construction, performance and traceability
- Meets military specifications, AS-33671, for dimensions, moisture content, tensile strength, life cycles, fluid immersion, melting point, and corrosion
- Manufactured with filtered Nylon 6/6 eliminating particle contamination reducing failures and discoloration
- Superior product manufactured with strict quality guidelines
- Finger grips provide easy handling
- Angled tail feature eases initial insertion alignment
- One piece design, transition rails, and 3 tooth pawl provide a low insertion force while maintaining a high tensile strength
- Rounded edges eliminate insulation damage and provides added safety

Air Handling Cable Ties

- Ideal Applications: Air Handling Spaces, above drop ceilings and below raised flooring
- Meets UL 1565 low smoke generation, low heat release, and mechanical strength test
- UL Listed suitable for use in Air Handling Spaces (Plenums) in accordance with the Section 300.22 (C) and (D) of the National Electrical Code and Rules 12-010 (3), (4), and (5) and 12-020 of the Canadian Electrical Code, Part 1
- Mounting Hole Style secures and positions wire bundles, cables, etc. to surfaces with one mechanical fastener

TECH TALK

What is the difference between a "plenum" and other "air handling spaces"?

According to the NEC, the area above a drop ceiling or below a raised floor is an example of an "other (air handling) space", whereas a plenum is the air carrying duct itself which may be located above a drop ceiling or below a raised floor. Wiring is permitted in both air-handling spaces, but only metallic wiring systems (and metallic cable ties) are permitted in "plenums"(ducts). AIR HANDLING TIES are "Suitable for use in air handling spaces in accordance with Section 300-22 (C) & (D) of the National Electrical Code". The bag label should contain the UL listed symbol.
