

EASY-SPLICE™

GSS: Insulate, seal and protect stub-splice connections up to 1,000 volts

ESGTS: Tap splice for underground, overhead and street lighting

ESGS: In-line sealed splice for underground, buried and overhead applications

Ideal for splicing and tapping temporary and permanent wiring, NSi Easy-Splice™ splice kits are the perfect solution for insulating difficult wire terminations on motor leads, and for quick power-ups in a constantly changing environment. Versatile in application, flexible and reusable.

Drop the tape and reach for Easy-Splice™.
