

Model Number

IVI-KHD2-4HB6

Control interface unit System IV
with PROFIBUS DP interface

Features

- PROFIBUS DP acc. to EN 50170
- Complete read/write functionality via the PROFIBUS DP
- Transmission of up to 14 words, 16 bit each, in one cycle
- Variable module length
- 4 read/write heads connectable
- Address adjustment via DIP switches
- Connectable bus termination
- 3 LEDs as indicators for each read/write head
- LED for power on / bus communication

Function

The control interface unit is operated as a slave on the PROFIBUS-DP. The device makes available the complete read/write functionality. Up to 32 bytes are transmitted per cycle. Of these, up to 14 words, each with 16 bits, are available to the user. The size of the input and output modules is variable. As a result, it is possible, by means of appropriate selections in the GSD file, to optimize the quantity of transmitted data for the given application.

Up to 4 read heads can be connected to the control interface unit.

The address is set via DIP switches, and the terminating resistor for the bus is connected via a rotary switch.

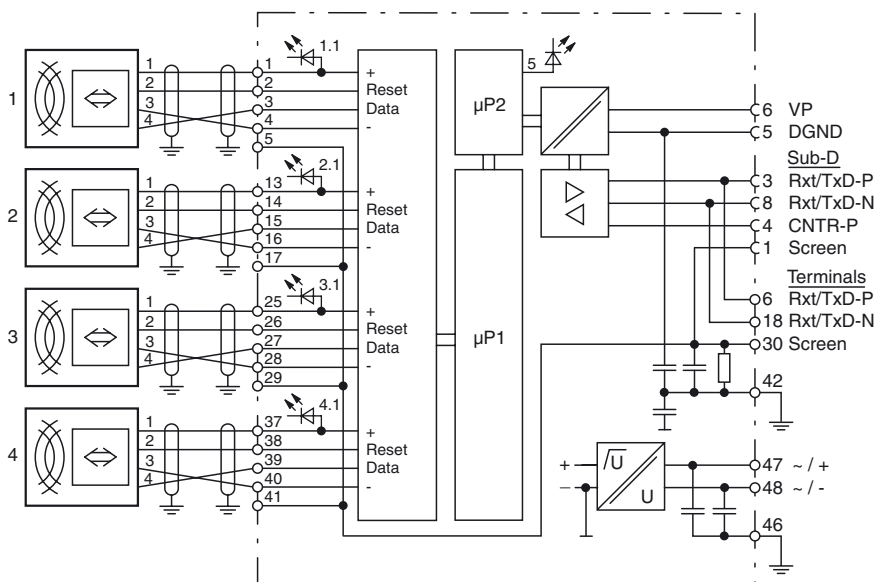

Software

The GSD file is included in the scope of delivery.
