

Low-V.O.C. Solvent Cements

Meet Green Building Requirements - In response to increasing public concern, requests from contractors and to be in compliance with the California Air Quality Management District Standards (SCAQMD) and the Ozone Transport Commission (OTC), RectorSeal® has added Low-V.O.C. solvent cements, primers and cleaners to it's line of quality products. These Low-V.O.C. products meet the requirements for LEED accredited projects. Each of these products have been formulated to provide the same superior performance and reliability as the company's regular solvent cements, primers and cleaners, which have been a preferred brand among contractors for more than 25 years.
