Specific lighting needs require specific tools. With the right lighting tool, you can identify potential or existing problems before they interrupt your ability to get the job done. In addition the costs savings of using the right tool over time will benefit your bottom line. LEDs don't require periodic bulb replacement like incandescents and are virtually indestructible. Streamlight's revolutionary C4 LED technology combined with an innovative Streamlight-engineered reflector provides sharp, focused light that rivals incandescent intensity without giving up the durability and longevity of an LED. Remarkably handy, the Streamlight Jr. LED is compact as a pen. Plus, with its machined aluminum construction and virtually unbreakable polycarbonate lens it is incredibly durable.
